

botspot, the Berlin based photogrammetry specialist and developer of premium 3D scanning systems, is one of the most innovative companies in this industry. Interested in joining our growing team? We are looking for a:

Frontend Engineer (m/f/d), full time Berlin

Your field of work:

- development of application software for scanning systems, web-based or desktop-based, from the design of UX and UI to the implementation into highly modern frameworks

Your profile:

- completed studies in computer science (diploma/bachelor/master) or similar preferable:
- professional experience with frontend development
- profound knowledge in the fields of UX and UI
- experience with modern web frameworks (e.g. Vue, Angular, React)
- experience with the desktop framework electron
- knowledge of relevant IoT technologies (e.g. HTTP, MQTT, Websockets)

Our offer:

- responsible, interdisciplinary field of work and projects in an internationally orientated high-tech company
- entry to the 3D industry, with multiple points of contact
- passionate team with a flat organization and an open business culture
- skill enhancement options
- employee share in the company

Looking forward to receiving your application, with your salary expectations and your earliest entry date, under career@botspot.de.
